I used the percent of yield method. Like if you had money in the bank drawing interest. I first did this on the population from Noah's flood till present year 2018. To see this calculation position the arrow over one of the cells holding the population number. Note the 0.0051582. This is the rate of yield I had to use to get the population correct in 2018. I then used that same rate of yield for the time from Adam and Eve to Noah's flood. I believe this method gives the most realistic numbers.

 Personally, I don't believe the traditional Adam and Eve story but, it appears most do. I've read articles that have the population at the time of Noah as high as nine billion. A very popular number is two billion. Me, I’d rather do the math with the numbers provided in the Bible instead of just grabbing them from the air.

</table>

Add the years in the following verses, give the years from Adam to the flood.

Gen 5:3, Gen 5:6, Gen 5:9, Gen 5:12, Gen 5:15, Gen 5:18, Gen 5:21, Gen 5:25, Gen 5:29, & Gen 7:11.

Add the years: 130 + 105 + 70 + 65 + 162 + 65 + 187 + 182 + 600 = 1656 years.

9,000,000,000. Nine billion. That’s a lot of zeros.

2,000,000,000. Two billion. That’s a lot of zeros.

</tbody>
</table>
Two billion population.

According to info on net two billion in 1927. No doubt wars could have an effect.
